

Assignment 2

1. Please replicate the codes to classify MNIST from the Learning Strategy slides (page 14-23).
2. Then conduct some experiments:
 - a. Try to apply L1 regularization: please define your L1 rate by yourself. Please check the `model.summary()`, performance and loss chart
 - b. Try to apply L2 regularization: please define your L2 rate by yourself. Please check the `model.summary()`, performance and loss chart
 - c. Try to apply Dropout : please define your Dropout rate by yourself. Please check the `model.summary()`, performance and loss chart
 - d. Try to apply early stopping : Please check the `model.summary()`, performance and loss chart
 - e. Try to apply both L1 regularization and dropout : Please check the `model.summary()`, performance and loss chart
3. Please create slides:
 - a. Page 1 : your identity
 - b. Page 2 : URL of your code
 - c. Page 3 : The results for scenario 2(a)
 - d. Page 4 : The results for scenario 2(b)
 - e. Page 5 : The results for scenario 2(c)
 - f. Page 6 : The results for scenario 2(d)
 - g. Page 7 : The results for scenario 2(e)
 - h. Page 8 : Conclusion
